

INTRODUCING THE NEW ISUZU D-MAX BLADE

Specially developed for Australian conditions to deliver the perfect balance of driving performance and ultimate comfort.

The D-MAX BLADE has been engineered for adventure – with better handling, versatility and capability. With limits tested on every surface and boundaries pushed at every turn during development, the D-MAX BLADE is a vehicle that will take you further than you ever expected.

With a locally-developed suspension tune, and wheels and tyres exclusive to this model, it's built to take on Australia's most challenging terrain. Dual 8-tonne rated recovery points, a 3mm-thick bash plate, tubular steel side steps and greater ground clearance will allow you to take on your next adventure with confidence.

The bold exterior styling is highlighted by a new grille and integrated lightbar, unique black decals across the bonnet, side and tailgate, matte black sports bar, Australian designed flow-formed 17-inch alloy wheels wrapped with Goodyear Wrangler Duratrec RT all-terrain tyres, and red bash plate and recovery hooks. Inside, the interior has been customised with embossed scuff plates, embroidered headrests and floor mats, and a build plate with unique numbering, making each vehicle truly unique.

Every adventure is made better with the Isuzu D-MAX BLADE.

Performance - Chassis and Suspension

To ensure the most comfortable off-road ride, the D-MAX BLADE has been upgraded with a lift courtesy of new suspension components, including 35-mm MTV twin-tube dampers, and a larger wheel and tyre package. These enhancements give the vehicle greater chassis control and off-road capability, without compromising 3.5-tonne towing. These enhancements also provide an improved turn-in response and increased driver confidence with greater vehicle stability across a variety of terrain.

Wheels

The 275/65R17 Goodyear Wrangler Duratrac RT all-terrain tyres, exclusive to this model, have been designed to be stronger and more durable. The superior traction and stability these tyres offer will improve the vehicle ride in on-road, off-road and wet weather situations, while the triple-ply sidewall offers puncture resistance when off-roading.

Recovery Points and Bash Plate

This vehicle is built for going further than ever before and sometimes that means you get yourself into 'sticky' situations. The reinforced single piece recovery point frame with a load rating of 8-tonnes helps you get unstuck when you've found the limit, while the 3mm-thick steel bash plate protects vital components during each adventure.

Exterior

Bolder, wider and taller, the D-MAX BLADE is our toughest looking D-MAX yet with an aggressive aesthetic emanating from the satin black grille, and a wider stance courtesy of contrasting fender flares and the fitment of wider wheels and tyres. An integrated lightbar lights up the road ahead, with a light throw of over 300 meters, while the signature red bash plate with rated recovery points provide a distinctive look. The tubular side steps and lightweight extended-leg sports bar, not only give a sportier look but those side steps offer better clearance and durability on tougher surfaces.

In addition, each D-MAX BLADE is fitted with special black badging and decals on the bonnet, sides and tailgate, as well as a unique build plate and customised production number in the engine bay and next to the transmission selector
