Please Note: information is accurate as at November 2024.

Specification and imagery are indicative and should only be used as a guide. Vehicle and accessory specification, features, colour and trim may differ at the time of vehicle delivery.

A man in a light blue shirt and dark jeans is jumping joyfully in the air, holding a large blue monkey plush toy. He is in a fairground at night, with various stalls and lights in the background. The stalls have signs for 'LAUGHING CLOWN', 'FAIRY FLOSS', 'EVERY BODY WINS ALL', and 'BLACK 2 DE TO WIN'. The man's expression is one of pure happiness, and his arms are outstretched. The monkey plush is bright blue with a white belly and a friendly face. The overall atmosphere is festive and celebratory.

# OH WHAT A FEELING

You'll feel it with every drive. In every twist and every turn. It's our unwavering commitment to move you, not only today, but well into tomorrow as we relentlessly reimagine the future of mobility.

With our eyes on the horizon, we're committed to creating a future where all of humankind is empowered with the freedom to move.

# Ready, set, Tundra.

The all-new Toyota Tundra is the ultimate expression of power, flexibility and luxury – a full-size pick-up that's as strong as it is sophisticated.

As the most powerful Toyota ever sold in Australia, the all-new Tundra's show-stopping presence is matched by the effortless confidence it inspires behind the wheel. Combining supreme comfort, space and quality with an expansive view of the world, Tundra is all about hitting the road in the most enjoyable way possible.

It's exciting to look at and even more exciting to drive, and is underpinned by the robustness that Toyota is renowned for. To re-engineer for right-hand drive and build the Tundra to Toyota's exacting standards, we have partnered with Walkinshaw Automotive Group – a global leader in the design, engineering, development and small-scale manufacture of performance vehicles.

# The power and the glory

Tundra drives on-road presence and performance to new levels, drawing attention and turning heads wherever it goes.

The Tundra's 3.5L V6 twin-turbo engine with 1 Motor Hybrid produces 326kW of power and 790Nm of torque, all harnessed by a 10-speed automatic transmission for smooth acceleration and rock solid performance on the road. A 1 Motor Hybrid is a powertrain technology where an additional electric motor, which typically serves to improve the power and performance of a vehicle, works in conjunction with the internal combustion engine.

The box section chassis delivers impressive body rigidity with reduced weight and is supported by multi-link rear suspension for improved ride and towing stability.

Everything about Tundra is designed and built to exceed your everyday expectations.

## Embrace the wide open space

Inside Tundra, you'll find yourself in a generously spaced cabin surrounded by the latest technology.

The 14" multimedia display features wired Android Auto™<sup>2</sup> and wireless Apple CarPlay®<sup>2</sup>. You are supported by the 12-speaker premium JBL®<sup>3</sup> audio system plus other functions including navigation – accessible through Apple CarPlay®<sup>2</sup> and Android Auto™<sup>2</sup> only.

When on the move the 12.3" Multi Information Display (MID) delivers essential performance data and travel information that can be quickly configured to suit your needs.

The seats are supportively contoured, providing both durability and comfort for long or short trips, on or off the road.

B Digital rear-view mirror  
C Power vertical rear window

D Dual-zone climate control  
E 10-speed automatic transmission  
F Part-time 4-Wheel Drive, electronic 2-speed transfer case

G Wireless charger

When it comes to shouldering a heavy load, the Tundra can get the job done, offering a maximum braked towing capacity of 4.5 tonnes.<sup>4</sup>

Tundra comes fitted with a 3.5 tonne integrated Towing Kit as standard and you have the option to purchase a 4.5 tonne Towing Kit or Load Distribution Hitch<sup>5</sup> for your towing needs. When towing loads above 2.2 tonne, Toyota recommends the use of a Load Distribution Hitch<sup>5</sup> to get the most out of your towing experience.

When towing, you'll also have the added on-road confidence that comes from a Towing Brake Controller and Trailer Back-up Guide.

# Toyota Safety Sense

Toyota  
Safety  
Sense

At Toyota, we believe it's simply not enough to say "safety comes first" – we prove it. That's why, in our ongoing pursuit of creating ever safer cars, now and into the future, we developed Toyota Safety Sense<sup>6</sup> (TSS). A suite of active safety features designed to help protect us all through helping to support safe driving.

Tundra features TSS driver assistance technologies, aiming to recognise and help avoid certain hazards and collisions, giving you and your passengers greater peace of mind wherever you're headed. Please visit [toyota.com.au](http://toyota.com.au) for vehicle and specification information.

## Pre-Collision Safety system with pedestrian and daytime cyclist detection

Pre-Collision Safety<sup>6</sup> (PCS) system with pedestrian and daytime cyclist detection is a multi-stage warning system. Using an integrated camera and radar to help detect other vehicles in front of you, the PCS system is designed to assist the driver where there is a likelihood of frontal collision with cars and pedestrians during day or night, or cyclists during the daytime. The PCS system includes a visible and audible alert of possible collisions, additional braking force to assist when you're braking, and if a collision appears to be unavoidable automatic braking to help mitigate impact.

## Active Cruise Control (high speed)

Active Cruise Control<sup>6</sup> is designed to help keep a constant distance between vehicles. It uses a millimeter wave radar to monitor the gap between your vehicle and the one in front, automatically accelerating or slowing down when needed to help you maintain a set distance.

## Lane Departure Alert with Steering Assist

Lane Departure Alert<sup>6</sup> with steering assist is designed to help prevent vehicles drifting from their lane by monitoring road markings, and providing a visible and audible alert should it detect any deviation from the lane. It may also apply additional steering force if needed to help you stay in your lane.
