Patrol Defy Ordinary

THE NISSAN PATROL

The iconic Nissan Patrol has always been the pinnacle of versatility. It is now also the pinnacle of luxury. The Nissan Patrol brings its rugged reputation and a refinement that focuses on the details. Make no mistake; the Nissan Patrol V8 is the most powerful 4x4 in its class[°]. Stylish additions like 18" wheels, a sophisticated grille and LED front and rear lamps, makes this 4x4 feel as comfortable in the driveway as it does on the mountain. With innovative safety features and Nissan Intelligent Mobility technologies, the Nissan Patrol also brings capability to a new and luxurious level.

* Cover page: Up to 10 years or 300,000km (whichever occurs first), when servicing at authorised Nissan dealers. Full terms at [Nissan.com.au/warranty](https://www.nissan.com.au/warranty).

[°] Class refers to Upper Large SUV <\$120k VFACTS Market Segmentation.

Ti-L model shown in Brilliant Silver

NISSAN INTELLIGENT DRIVING OFF-ROAD CAPABILITY

The Nissan Patrol brings with it the technology, design and forethought needed to tackle almost any terrain. For instance, the Intelligent 4X4 technology allows the driver to switch between a range of different modes including sand, on-road, rock and snow with the push of a button. Hill Start Assist and Hill Descent Control systems give the driver the utmost confidence to take the road less travelled. When the road gets that much tougher, the driver can engage the electronic rear differential lock with the push of a button. When it comes to the Nissan Patrol, capability is everything.

4H
Stay on track despite the best efforts of slippery surfaces.

4L
Soft surfaces, mud, steep inclines, the Patrol can do it all.

HILL DESCENT CONTROL
Ensure you command the downhill rather than the other way around with the advanced Hill Descent Control and do it all with the simple push of a button.

SAND
Tackle sandy conditions with ease and confidence.

SNOW
Snow is no match for the Patrol.

ON ROAD
Get the most out of your on road experience.

ROCK
Adjust throttle characteristics to crawl over rocks with ease.

REAR DIFFERENTIAL LOCK
The electronic rear diff lock allows you to gain traction in tough conditions with the simple push of a button.

HYDRAULIC BODY MOTION CONTROL

The Hydraulic Body Motion Control (HBMC) suspension system has been implemented to ensure remarkably low body roll when powering through corners and provides better traction through rough terrain. HBMC plays both the role of shock absorbers and stabiliser bars, allowing for full wheel travel, meaning your wheels will stay firmly on the ground when you're off the beaten track. The HBMC system provides this balance and superior cornering by monitoring force and then distributing pressure to either the outer or inner double wishbone suspension system. This HBMC system delivers a smoother ride, safer cornering and overall enhanced stability.

POWER AND PERFORMANCE

With power comes performance. That's exactly what the Nissan 5.6L V8 Direct Injection engine delivers, sporting an impressive 298kW of power and 560Nm of torque. At ease off the beaten track, the Nissan Patrol also features electronic rear diff lock, Hill Descent Control, Hill Start Assist. While 3,500kg* of braked towing capacity and seven-speed automatic transmission ensures you're equipped to go anywhere.

*Towing capacity is subject to towbar/towball capacity and is based on the fitment of a Genuine Nissan towbar. Towing capacity figure described is a maximum figure. Actual towing capacity depends on the laden mass of the vehicle, driving conditions, fitment of any accessories or towing equipment limitations including the maximum towball download.

£ CarPlay is a registered trademark of Apple Inc. Android Auto is a trademark of Google LMC. Compatible device required. Wired connections require a USB connection.
¥ Compatible device required.
μ Note the maximum charge rate for MagSafe phones is 7.5W

NISSAN INTELLIGENT DRIVING EMPOWER YOUR SAFETY IN THE NISSAN PATROL

The Nissan Patrol comes equipped with a huge array of technologies that will ensure you're driving safely. Across the range, you'll find technologies like Intelligent Cruise Control, Intelligent Forward Collision Warning, Intelligent Lane Intervention, and Intelligent Blind Spot Warning.

INTELLIGENT REAR VIEW MIRROR
The Intelligent Rear View Mirror has been innovatively designed to help drivers "see around" second and back row interior obstacles, improving visibility and helping maintain a clear view of the conditions and traffic behind them.

REAR CROSS TRAFFIC ALERT*
Rear Cross Traffic Alert can help you be more aware of your surroundings and back out of a space more safely. With radar sensors watching the rear, your Patrol can detect and warn you about cars approaching from either side.

INTELLIGENT BLIND SPOT INTERVENTION*
Smart technology like the innovative Blind Spot Warning and Intervention system detects vehicles in your blind spot and alerts you via an audible alarm. If, for instance you continue to change lanes and the car in your blind spot also continues to proceed, the system will initiate, gently braking one side of the vehicle, bringing your vehicle back to your original lane position, well out of harm's way.

INTELLIGENT EMERGENCY BRAKING
Using radar technology to monitor the velocity and distance of up to two vehicles ahead, Intelligent Forward Collision Warning can give you audible and visual display warnings to help you know when to reduce your speed. If required, the Intelligent Emergency Braking* will apply automatic braking to avoid or reduce the damage caused by the collision.

Ti-L model in Brilliant Silver. *Drivers' aids only and should not be used as substitutes for safe driving practices. Always monitor your surroundings when driving.

Ti

- VK56VD 5.6 litre VVEL V8 petrol engine with 298kW and 560Nm
