1 Weights/mass/volumes/dimensions are approximate and subject to individual vehicle variances, and should be confirmed before fitting any accessories, towing or otherwise relying on this value.

2 Maximum vehicle braked towing capacity is subject to state and federal regulatory requirements. Before towing, customers should consider the vehicle's limitations, including towing capacity specifications, gross vehicle mass (GVM), gross combined mass (GCM), kerb weight specified by the manufacturer, and ensure that individual front and rear axle load limits are not exceeded as also specified by the manufacturer. Vehicle payload calculation is GVM less kerb weight or as otherwise specified in the vehicle owner's manual. Actual payload is affected by any added load to the vehicle, including the number of occupants, luggage, accessories, and tow ball download weight. It is important to consider the actual payload, to ensure the fully loaded vehicle remains within the specified GVM limits. For more details, please refer to the vehicle's Owner's Manual/ **Toyota Basic Towing Guide** or consult your authorised dealer.

3 Results were achieved under laboratory conditions and do not reflect the fuel consumption in real world driving. Refer to page 4 and 9 for ADR81/02 fuel consumption testing results achieved for all HiLux 4x2 and 4x4 variants. Results were produced using new sample vehicles without fitment of accessories/customisation, and may not be replicable.

4 Functionality varies depending on device. See toyota.com.au/connected/multimedia/toyota-link for compatibility. Speak to your dealer about device compatibility. Requires compatible device, USB connection [or Bluetooth® connection for vehicles fitted with wireless CarPlay®/Android Auto™, mobile data, network reception and GPS signal. Mobile usage at user's cost. Apps subject to change. For details see toyota.com.au/connected.
