(1) based on WLTP (Worldwide Harmonised Light-Duty Vehicles Test Procedure) static laboratory combined average city and highway cycle test, which measures energy consumption, range and emissions in passenger vehicles, designed to provide figures closer to real-world driving behaviour. Real life driving results will vary depending on factors, including but not limited to driving style, type of journey, battery age and condition, use of vehicle features (such as heating and air conditioning), as well as operating, environmental and climate conditions. Figures stated for the purposes of comparison amongst vehicles tested to the same technical procedures.

(2) all figures are approximate and actual charging times may differ. Charging times may vary based on factors including but not limited to charger type and condition, battery temperature, electricity supply, auxiliary consumables (e.g. air-conditioning) and environmental conditions.

^^ The weights indicated for towing capacities are for a basic vehicle without options. These may vary depending on your vehicle's equipment, accessories, passengers & any cargo on board. Please consult your Renault Dealership or the vehicle's owner handbook to confirm your towing requirements to ensure compliance with approved towing limits.
