optimal loading space

With a best-in-class loading length of 4.15 m⁽¹⁾ using the ingenious load-through flap⁽¹⁾ under the passenger bench seat and up to 2.5-tonne* towing capacity, nothing stops Renault Trafic.

overseas model shown

4.15 m loading length thanks to the load-through flap under the passenger bench seat⁽¹⁾

The loading volume of up to 6.7 m³ means you have plenty of space for everything you need: tools, supplies, bulky items, rubble, and more.

6.7 m³ of loading volume⁽¹⁾

The vehicle also features two⁽²⁾ lights in the loading area and up to 16 anchoring points.

overseas model shown

up to 16 anchoring points and two lights in the loading area

(1) 4.15m load length and 6.7m³ cargo bay volume on LWB Premium version thanks to load-through flap under the passenger bench seat.

(2) one light on crew versions.

* 2.5-tonne towing on MT diesel versions

maximum versatility

Renault Traffic crew versions can carry up to 6 people. Transport your whole team when you need all of them for your projects.

crew lifestyle

The seats on Traffic Crew Pro can be folded forward, freeing up space in the cargo area. Make use of the space in different ways, and transform the rear into a ready to use workshop.

crew lifestyle cabin area

crew versions are available with diesel motor only

05. advanced driver assistance systems

advanced driver assistance systems

Renault Traffic is equipped with a suite of innovative advanced driver assistance systems earning an ANCAP Gold[^] van safety comparison rating.

"zoning" function
For independently locking or unlocking either the front doors or the loading area.

airbags
Front and side airbags protect the driver and passengers against violent impacts.

lane departure warning
Warns the driver if the vehicle is approaching or drifting into another lane without intending to (without first activating the indicator).

active emergency braking system
Standard across the range, this system is able to detect both moving and stationary vehicles, as well as pedestrians and cyclists. The driver is warned via a visual and audible alert, if the driver doesn't brake or doesn't brake hard enough the system supports with braking.

blind spot warning
This system warns the drivers of vehicles in their blind spot, helping avoid collisions.
Standard on Premium and Lifestyle, optional on Pro.

parking sensors
Radar sensors facilitate your manoeuvres by warning you with audio and visual signals when there are any obstacles around you.

driver attention alert
This system analyses the driver's behaviour and warns of any risk of fatigue. If excessive fatigue is detected, the system recommends the driver to take a break with a visual and audible message on the instrument panel.

automatic high/low beam headlight activation
This system works using a camera positioned at the top of the windscreen. The camera analyses the light flows based on lighting and traffic conditions.

driver assistance systems

- traffic sign recognition and overspeed prevention
- automatic high/low beam headlight activation

safety assistance

- airbags
- blind spot warning
- driver attention alert
- lane departure warning
- active emergency braking system

park assist systems

- parking sensors and rear camera
- "zoning" function

[^]Tested 2024. Applies to vehicles built from November 2024 onwards. For more information refer to ANCAP website.
