

Farizon SV

Introducing the Ultimate Electric Van

The Farizon SV Electric Van brings unmatched versatility, range, and technology to Australia's commercial vehicle market. Purpose-built from the ground up as an electric commercial vehicle — featuring intelligent driving assistance, no B-pillar design, flexible layout and optimised chassis body structure resulting in comfortable urban driving.

Your engine is holding you back

Experience the future of delivery with our revolutionary electric powertrain. The Farizon SV Electric Van features a high-capacity lithium-ion battery delivering exceptional range and rapid charging capabilities. This powerful yet silent system eliminates emissions while providing instant torque for responsive acceleration, even under full payload.

Advanced battery management ensures optimal performance in all conditions, with regenerative braking that extends range during city deliveries.

Say hello to sustainable, efficient transportation that keeps your business moving forward.

Room to work. Power to move

⤴
16" Steel Wheel
With Decorative Cover

Hidden B-Pillar Design
Allows for extra large side opening
diverse scenario expansion

Rear barn doors
Feature two-stage opening,
flexibly swinging 180° or 270°

Interior that works as hard as you do

Step into the Farizon SV Electric Van thoughtfully designed interior where comfort meets functionality. The cabin offers premium features including heated and ventilated seats that keep you comfortable in any climate.

Stay in control with the heated steering wheel during colder months, while the intuitive floating central control screen puts vehicle functions at your fingertips.

Air conditioning

With physical controls

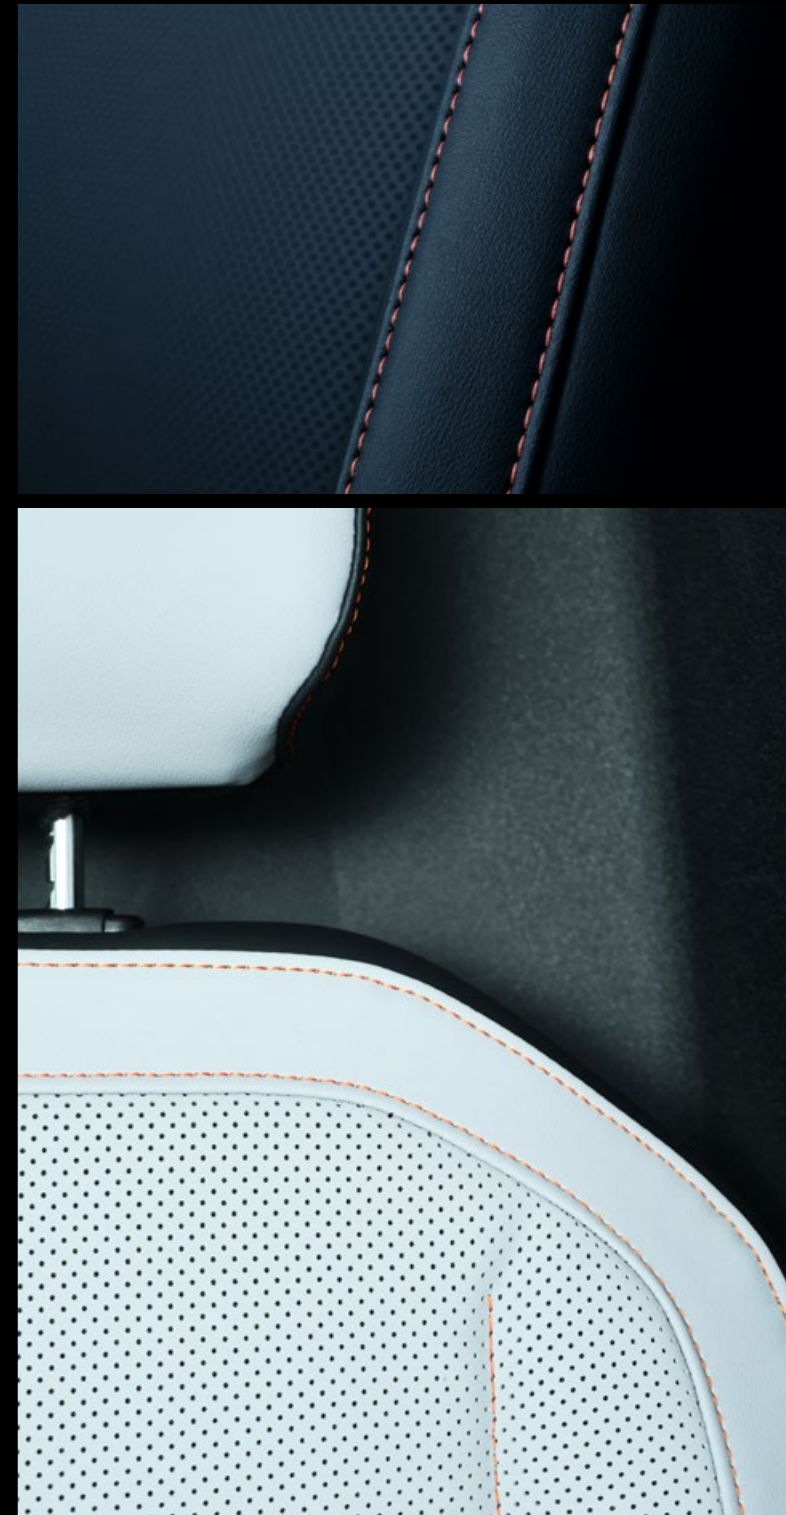

Heated Multifunction Steering Wheel

Heated and ventilated faux leather seats

12.3" LCD Infotainment Screen

Payload Weight Monitoring System

Mobile Power Station

Available with a 83kWh LFP or 106kWh NMC battery, the Farizon SV Electric Van delivers exceptional range and reliability. CATL's battery technology ensures superior performance, longer cycle life, and enhanced safety for your business operations. Experience impressive driving range of up to 398km² on a single charge, perfect for daily delivery routes and service calls across metropolitan and regional areas.

Fast charging capabilities get you back on the road quickly with DC charging up to 140kW, taking you from 20% to 80% battery in just 36 minutes³. For overnight charging, the 11kW AC charger provides a full charge in approximately 9 hours, ensuring you start each day with maximum range.

Transform your Farizon SV Electric Van into a versatile power source with our innovative V2L (Vehicle-to-Load) technology. The integrated 240V output delivers 3.3kW of continuous power—enough to run power tools, catering equipment, or emergency backup systems wherever your work takes you.

With V2L functionality, the Farizon SV Electric Van delivers exceptional value beyond traditional vehicles, providing power solutions that enhance your business capabilities in the field.
