QUALITY CONSTRUCTION

MADE FOR THE LONG JOURNEY

Jayco camper trailers are built using advanced materials and proven construction methods — not to impress on paper, but to perform where it matters. Designed for Australian conditions and real-world travel, every detail is made to deliver lasting strength, everyday comfort and confidence over years of ownership — not just the first trip.

1. ONE-PIECE PRESSED ROOF

Improved water runoff, enhanced insulation and stronger overall thermal performance for lasting comfort and durability.

2. ALUMINIUM FRAME CONSTRUCTION

An aluminium frame — not timber — provides increased structural strength with reduced weight, supporting confident towing and long-term reliability.

3. EASY-GLIDE SLIDE-OUT BEDS[^]

Slide-out beds with a one-piece composite base and nylon rollers deliver smooth operation and durable sleeping support.

4. AUSTRALIAN-MADE DOUBLE-STITCHED CANVAS

Durable double-stitched canvas with water-resistant Bolti-Flex lining delivers weather protection and performance.

5. HOT DIPPED GALVANISED ENDURANCE CHASSIS

Each chassis is hot dipped galvanised inside and out, delivering superior corrosion resistance, strength and reduced maintenance over time.

6. JTECH 2.0 INDEPENDENT SUSPENSION*

Jayco's JTECH 2.0 suspension system enhances stability, handling and ride comfort, helping deliver smoother, more predictable towing.

* Available on Outback models only.

EUROSTYLE FURNITURE

Unique to Jayco is the aluminium furniture construction which consists of aluminium extrusions incorporated into the furniture framing to increase strength and durability.
