Actual range varies with conditions such as external elements like temperature, driving behaviours, route profile, vehicle maintenance, and lithium-ion battery age and condition. WLTP Overall Range reflects a combined driving cycle. This test is conducted in controlled conditions with an ambient temperature of 23 degrees Celsius and no climate or electrical load. 2. Charging times may vary. Charging rate and time are dependent on battery state of charge, charger output, battery temperature and ambient temperature. 3. Requires professionally installed Wall Box at home (not supplied) or can be used at public charging stations. 4. Vehicle dimensions are approximate and subject to individual vehicle variances, and should be confirmed before fitting any accessories or otherwise relying on this value. 5.
