

 **HONDA**

Honda Super-ONE

Super fun.

Honda Super-ONE

Super fun

There's a certain kind of person who walks into a room and the energy changes. That's Honda Super-ONE. It's Australia's first EV from Honda – born from decades of Japanese engineering obsession and distilled into something super fun sized. With its retro-inspired styling and an electric heart that reinvents what a Honda can sound like, it arrives not to fit in but to stand out.

Honda Super-ONE brings with it a personality that makes every other car on the block look like it's trying too hard to be sensible. It sounds different, it feels different and it drives like Honda just gets that cars are supposed to be fun.

Honda Super-ONE

Distinctly Japanese. Unmistakably Honda...

Honda has been making small cars for decades. Not smaller for the sake of it, but smaller with intent. Clever proportioning, lightweight, every centimetre considered and nothing wasted. That's the Kei Car philosophy and it's exactly what Honda Super-ONE is built on. 3.6 metres long, 1.6 metres wide and yet it never feels like a compromise. In a sea of lookalike EVs, Honda Super-ONE is impossible to ignore.

What's more, this philosophy now carries an electric heart. Honda Super-ONE brings Honda's Kei Car thinking into battery-electric form; the same obsession with intent, packed into something entirely new. Proof that a brand with this much history approaches every detail thoughtfully.

ホンダスーパーワン

PERFORMANCE

Built light to perform right.

Honda Super-ONE keeps things light at just 1,093 kilograms. Built on Honda's N-Series Kei platform, its compact dimensions, low centre of gravity and wide stance combine to deliver agile, responsive handling. Every detail has been designed with purpose. From the blistered guard flares to the carefully engineered bodywork, Honda Super-ONE manages airflow efficiently to enhance stability and performance. The result is a car that's as rewarding to drive as it is distinctive to look at.

HONDA SUPER-ONE

Choose your adventure.

Choose from ECON, City, Normal and Sport modes to suit every journey. Whether you're maximising efficiency, tackling the morning commute, or enjoying your favourite back road, Honda Super-ONE adapts to your driving style.

City Mode introduces Single Pedal Control, allowing you to accelerate and decelerate using only the accelerator pedal, making stop-start urban driving even more effortless.

When the road opens up, Sport Mode sharpens response and adds simulated gear shifts for a more playful driving experience.

And if you need a little more punch, Honda Super-ONE delivers with BOOST Mode, providing an extra surge of electric performance.

BOOST Mode, engaged.

There's a button on the steering wheel. It's small, purple and just reads "BOOST". Press it and something shifts. Literally. The cabin light turns purple. The Bose³ speakers play a synthesised engine-like soundtrack in response to the way you drive. The gauges transform. The paddles wake up. And Honda Super-ONE, which a moment ago was perfectly happy being a sensible city car, becomes something else entirely.

70kW and seven simulated gears enhances not just the power but also the feedback you'll feel while driving. This is BOOST Mode. It doesn't change where you're going, it changes how it feels to get there. Small car, big fun. Now you know which button to press.

³BOSE is a registered trademark of BOSE Corporation.

Good looking. Good thinking.

Honda Super-ONE was designed to turn heads, and it certainly does that. Blistered fenders flare wide over each wheel, giving it a stance so planted it looks like it's already cornering.

We weren't just thinking about how it looks, though. While select interior and exterior components incorporate recycled and bio-based materials, Honda Super-ONE isn't loud about any of it. There's no green badge on the tailgate, no earnest footnote in this brochure. We just quietly made better decisions about what goes into the car and then got on with making it look as fun as it is to drive.

Designed from the inside out.

Honda Super-ONE saves its best surprises for the inside. Ambient lighting that shifts from blue to purple at the press of a button. Sports-inspired seats that hold you exactly where you need to be. The dashboard's elegant horizontal beam designed seamlessly to incorporate clever storage spaces. And rear seats which perform a vanishing act that is nothing short of magic.

SMALL IN SIZE BIG ON FLEX

Flexible space is Honda Super-ONE's superpower. Fold the rear seats down for extra boot space, flip them up and you've got a tall, open cargo area that swallows things other cars won't even attempt. Honda Super-ONE makes the most of every centimetre of space. Clever Magic Seats offer 18 unique seating combinations, making it easy to accommodate everyday essentials to larger items with ease. Most small cars ask you to choose between passengers and cargo. The Honda Super-ONE makes that conversation redundant.

Tech that excites.

Don't let the size fool you, Honda Super-ONE is bursting with the kind of smart technology that'll make a big car blush.

Charge it your way.

Honda Super-ONE keeps charging simple. The front-mounted port gives you easy access, even in the tightest city parking spot.

At home: the included portable AC charger plugs into a standard power outlet, no special installation required.

On the go: using a compatible fast charger, you can top up to 80% in as little as 30 minutes⁷. Google Built-In² maps out charging points along the way, so finding one is just as easy.

⁷Charging times are indicative only and may vary depending on charger type, power supply, battery temperature and vehicle condition.

²Google, Android, Google Play, Google Maps and other marks are trademarks of Google LLC. Some Google Built-In features require an internet connection, this can be performed through the vehicle with an active Honda Connect subscription. For USB connections: Compatible Android.

³BOSE is a registered trademark of BOSE Corporation.

Warmth at your fingertips.

Stay comfortable on colder days with heated front seats and a heated steering wheel. Providing warmth exactly where you need it, they help make every drive in Honda Super-ONE more enjoyable.

Just say "Hey Google"...

With Google Built-In², your car becomes a digital personal assistant that's ready whenever you are. Operated via your Google account, you can stay connected to your car wherever you are.

Inside the cabin your experience is entirely untethered and hands-free, with voice-controlled navigation, calls, music, messages, calendar and cabin settings. Integrated maps will show nearby EV charging points along your route. You can even manage compatible smart home devices from the driver's seat, letting your day flow smoothly before, during and after every drive.

Small car. Big sound.

The eight-speaker Bose³ Premium audio system in Honda Super-ONE was developed specifically for this cabin – tuned to the exact dimensions of the interior so that every seat feels like the best seat in the house. A booming subwoofer sits beneath the boot floor, doing the kind of work you'll feel as much as hear.

In everyday driving it's just a very good stereo. Hit Boost and it becomes part of the experience, with Active Sound Control working through the same speakers to deliver the simulated engine note and gear shifts that make Boost Mode what it is.

Confidence, electrified.

Every Honda Super-ONE comes with an 8-year battery warranty¹², included from day one. It's our way of making sure the joy of electric driving comes with confidence.

Eight years. One promise. To make sure owning a Honda feels as good eight years in as it does the day you first drive it home.

¹² 8-year/160,000km High Voltage EV Battery Warranty applies to the Honda Super-ONE high-voltage battery only and is subject to terms, conditions and exclusions. The warranty period ends on the earlier of 8 years from first registration or 160,000km.

Honda
CONNECT

HONDA SUPER-ONE

Your Honda Super-ONE in your pocket.

Honda Connect Gen2⁸ delivers one of the most comprehensive connected suites on the road. You can now control your car from your phone, featuring remote locking, location tracking and remote immobilisation functions.

Automatic Collision Detection¹¹

In the event of airbag deployment, a notification will get sent promptly to the device logged into Honda Connect. The app will also alert a Honda Connect Customer Care agent, who will call the Honda Connect user and dispatch emergency services to the location if there's no response.

Digital Key

Your smartphone is your key. Lock, unlock and start your Honda Super-ONE straight from your phone, just like you would with your physical key.*

*Keep your physical key and mobile phone in the vehicle while driving as the car will not start if your device is out of battery, has no internet connection, or isn't inside the vehicle.

⁸ You must keep your physical key and mobile phone in the vehicle while driving. The engine will not start if your mobile device is out of battery, has no internet connection or is not inside the vehicle. Some Honda Connect app features are only available if your vehicle is linked to your Honda Connect account and connected services is activated. Remote vehicle features vary by model and not all vehicles will have all features.

¹¹ Automatic collision detection is unavailable where there is no telecommunications network coverage, and may be unavailable during system maintenance or unplanned interruptions. This feature should not be relied on in the event of an emergency.

Honda
SENSING

HONDA SUPER-ONE

Safety that sees more.

Honda SENSING³⁰ delivers a suite of intelligent driver assist features that work quietly and intuitively in the background to help keep you safe and aware. From tight parking to sudden traffic changes and busy freeways, it offers confidence boosting support without interrupting your drive.

Traffic Jam Assist

Works in conjunction with the Lane Keep Assist System to apply steering torque, keeping your vehicle centred in lane during heavy traffic.

Adaptive Cruise Control with Low Speed Follow

Helps maintain a constant vehicle speed and a set following interval behind a vehicle detected ahead of yours and, if the detected vehicle comes to a stop, can decelerate and stop your vehicle.

Road Departure Mitigation System

Alerts and helps to assist you when the system detects a possibility of your vehicle unintentionally crossing over detected lane markings, or approaching the outer edge of the road surface or a detected oncoming vehicle.

Lane Keep Assist System

Provides steering input to help keep the vehicle in the middle of a detected lane and provides audible and visual alerts if the vehicle is detected drifting out of its lane.

Collision Mitigation Braking System

CMBS is designed to alert you when a potential front collision is determined. When a collision is deemed unavoidable, it reduces your vehicle speed to help minimise collision severity.

High-Beam Support System (HBSS)

Automatically changes your headlights from low to high on a clear road, and then back to low beam when an oncoming vehicle is detected.

³⁰ Honda SENSING is driver-assist technology. Drivers must continue to drive safe and monitor the road and not rely on technology. Accuracy and operation of Honda SENSING may vary based on weather, speed, traffic, road conditions, markings and other factors. Refer to owner's manual.

COLOUR GRADES

Four ways to stand out.

Honda Super-ONE comes in four colour variants, including the hero shade Boost Violet Pearl, a deep purple that's inspired by lightning.
